

SKID BANDING TABLE

FEATURES

- Provides continuous rotation.
- Suspended strapping tools for banding the coils to the skid.
- Uses Bushman AvonTec rotary conveyor.
- Also uses a jib crane with a portable bander.

SKID STRAPPING SYSTEMS SECURE THE STACKED MULTS TO THE SKIDS.

- Incorporates a steel strap system or a plastic strap system.
- Plastic strapping heads provide a welded joint. There are no fumes with the friction heat type of welded joint.
- Steel strapping heads provide a mechanical punched joint, with or without seals, or a welded joint.
- Strapping head tools from Signode, Cyklop, Itipack, Titan, Fromme, etc. may be incorporated in the Avon system.
