

TURNSTILES

FEATURES

Most slit coil packaging lines are located directly after the exit turnstile of the slitting line they service. Coil cars move slit coils to a turnstile that stores up to four sets of slit coils. Coils can be unloaded by a C-hook, coil car or downender.

- 8,000 to 100,000 pound capacity.
- Two, three or four-arm units.
- U-shaped arms for c-hook or coil grab access.
- Hydraulic pusher if required.
- Hydraulic positioning latch if required.
- Hydraulic coil clamps available.
